ALLOWANCE

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Brian E. Szymczak on 10/18/06.

The application has been amended as follows:

In claim 1 line 11 after "in the vicinity of said active electrode and " delete -- the gap -- and insert "between the gaps"

In claim 7 line 13 after "electrode coil is wound" insert "in a proximal direction"

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 83-88 been renumbered 84-89.

Insert claim 83 "The probe of claim 1, wherein the active electrode comprises a distal end shaped into a flattened disc."

Claims 13, 15-22, 28-36, and 38-82 are cancelled.

The following is an examiner's statement of reasons for allowance: Claim 1 and it's dependents are allowed because the recited combination of elements of an electrosurgical probe including a shaft, a return electrode formed into a coil having a lumen and a plurality of turns with gaps between the turns, the return electrode being supported by the shaft, an active electrode disposed through the lumen and projecting beyond the coil and also being supported by the shaft, a spacer disposed around the active electrode and supported by the shaft and also insulated from the return electrode, and an electrically conductive fluid delivery element adapted to deliver the fluid between the gaps between turns of the return electrode coil and in the vicinity of the active electrode is not found nor fairly taught in the prior art of record, as argued by applicant and agreed by examiner.

Claim 7 and it's dependents are allowed because the recited combination of elements of an electrosurgical probe including a shaft, a return electrode formed into a coil having a lumen and being supported by the shaft, the coil being wound in a proximal direction from a length of wire having a distal terminus and wherein the terminus is arranged within the return electrode coil lumen, an active electrode disposed through the lumen and projecting beyond the coil and also being supported by the shaft,

a spacer disposed around the active electrode and supported by the shaft and also insulated from the return electrode, and an electrically conductive fluid delivery element adapted to deliver the fluid in the vicinity of the active electrode is not found nor fairly taught in the prior art of record, as argued by applicant and agreed by examiner.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Benjamin Huh whose telephone number is 571-272-8208. The examiner can normally be reached on M-F: 9:00 AM - 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin Sirmons can be reached on 571-272-4965. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
